No. 21

## OLD AGRICULTURAL HALL, SOON TO BE LIBRARY, APPROACHES COMPLETION

**Good Prospects for Winning  
Nine; Rumor of Trip To  
Cuba**

To many students the agricultural building is like the Colossus of Rhodes—once down it stays down, but as a matter of fact, it more truly resembles the great pyramid of Khufu in that it occupies much time in its building. Authorities hope, however, that it will be ready for use within the next six or seven weeks, depending upon the weather.

Contractors assert that they could have built a complete new building quicker than they could erect a structure within the blackened shell left by the disastrous fire last April. More than a month was lost in clearing away wreckage and in testing walls, actual work not beginning until the latter part of October.

Great sandstone columns, similar to those destroyed by the fire have been erected and once more the structure assumes a shape similar to its former self. The interior, however, is being materially changed, being rebuilt as a library.

The roof will be dotted with skylights looking into the library and reading rooms. The corner rooms, some of which are now practically complete, will be occupied by the various literary societies, it is understood.

As soon as possible the present library will be moved into its new quarters. The space made vacant in the main building will be utilized by the agricultural division.

## SONGBIRDS SCORE MORE VICTORIES

**Charlotte, Gaffney, and Chester Applaud Clemson Glee Club Show**

The Clemson Glee Club is attracting a great deal of interest and enthusiasm from the general public on its tours. Last week the singers visited the cities of Charlotte, N. C., Gaffney, and Chester, S. C.

The program which was rendered at these towns was practically the same as the one which created so much favorable comment in several other parts of the state week before last. The newspapers of these towns commented very favorably on the club.

The quartet, orchestra, choruses, readings, Fred Leitzsý, and "Jake" Cromer were all in their prime and were applauded at every stop of their itinerary. They were very highly complimented on the way in which they rendered their program.

The singers were entertained on the trip with two receptions and a dance.

In "The Ceramicist", journal of the ceramic arts, for January, a leading article "The High Grade Clays of South Carolina," is contributed by Dr. F. H. H. Calhoun, Director of Resident Teaching in Agriculture, and Professor of Mineralogy. Dr. Calhoun is the author of numerous texts on mineralogical subjects, and is a frequent contributor to technical magazines. This week he is attending the annual meeting of the American Ceramic Society in Atlanta.

## JUNIORS ORGANIZE FOR SUMMER CAMP

**Clemson To Strive For Victory  
in Competition at Camp  
McClellan**

With the fast approaching days of spring the juniors who are going to camp, are organizing their teams for the annual field-day which is held near the end of the camp. Clemson never has done well in this field-day and the main reason is that there has never been any organization of the men.

President Sikes, Colonel Cole, Coach Saunders, and Professor Henry are making an attempt to organize the various teams before leaving for camp. Coach Saunders is going to coach, along with the track team, men who want to enter in the track sports. Men interested in baseball will be coached with the varsity team. Professor Henry will issue as much equipment as possible to men who want to try for these camp teams. Besides the base-ball and track there will be teams in boxing, wrestling, swimming, and tennis.

D. H. ("Cutty") Ross has been elected general manager, or chief "go-between" between the camp officials and the Clemson contingent. Baseball and track captains have not been elected yet. Their captains will be the captains of next year's varsity teams. For the swimming team "Pete" Reynolds has been elected captain; for boxing and wrestling "Ern" Carpenter, for tennis Joe Fishburne.

There are many Juniors in barracks who are good athletes and they should try to make these teams. They will work hard with the end in view of bringing back all of the cups that are to be given away.

—J. K.

## CALHOUN SOCIETY TO TRY MITCHELL

**"Red" Mitchell Charged With  
Bringing Dishonor to His  
Society**

On Tuesday night, March 2, in the Calhoun Literary Society Hall, Mr. R. H. ("Red") Mitchell will be tried by a special court of the society, for the breaking of one of the rules of the society. Mr. Mitchell is charged with bringing dishonor to the society, in that he did, on Sunday, Feb. 21st, "beat out" of church and go out with field glasses, along with Lt. Colonel Douglas, to catch "beat outs".

J. M. Law, president of the society, will act at judge, and J. P. Batson as prosecuting attorney. Mr. Batson will be aided with the offense by R. A. Gibson. The defendant has chosen D. H. Ross as his defender, with J. A. Milling as assistant. H. E. Russel will be foreman of the jury. This case is creating quite a sensation among the members of the society, and it is expected that the court room will be filled.

## TIGER BASKETEERS WILL PLAY IN BIG CONFERENCE TOURNEY

**"Tink" Gillam's Quintet  
Meets North Carolina in  
Atlanta Friday.**

The Tiger team leaves the lair Friday morning enroute to Atlanta and the Southern Conference tournament. The first contest that they will engage in will be with the University of North Carolina, the 1925 champions of the Conference. This game will take place at five o'clock Friday afternoon.

The Tigers have met the North Carolinians once this season and know the calibre of the team that they are going up against. Although not in the pink of perfection when they played the Tar Heels on their native soil early in January, the Tigers have since hit their stride and have been going some better than at that time, and they expect to give the boys from the Old North State a stiff run for their money if they intend to cop the title again this year.

Although the Tigers have not played nine conference games, they had nine scheduled. One of these, the one with the University of Kentucky, was not played due to the late arrival of the Kentuckians, and the other game which was to be played with Maryland here, has been cancelled. This, however, does not bar Clemson from the tournament since the required number of games for admittance to the final race would have been played had not complications set in.

So the Tigers are going. There is one more chance to settle up with N. C. U., Tigers, so let's make that date fatal for the Tar Heels.

## JUNIORS WILL GIVE PROM FRIDAY NIGHT

**LaMotte's Orchestra, of Columbia, to Play for Second  
Hop of Club**

On Friday evening, next, those of "Tigertown" who are lovers of terpsichorean art will be filled with joy, for that is the date of the Junior Dance. The campus will again be the gathering place of some of the most popular and most beautiful young ladies of South Carolina and neighboring states, and at nine o'clock that evening the big gymnasium will become the most popular place for miles around.

This will be the second dance given by the Junior Dancing Club this year, and those who are on the committees are striving to make this one even better than the last. The reception committee has been busy placing the girls and every thing is getting set for the big day.

The music for the occasion will be furnished by Walter LaMotte's Orchestra of Columbia. This same orchestra played for the Athletic Ball last spring. It is said that they now play even better than they did at that time.

Mess Officer J. D. Harcombe has invited the boys to bring their guests to the mess hall for dinner immediately after retreat on Friday.

## LIST OF STUDENTS WITH HIGH GRADES ON FIRST SEMESTER IS ANNOUNCED

### SENIOR CIVILS SEE LAKE LANIER DAM

The eight seniors who specialize in the mysteries of civil engineering, accompanied by two members of the faculty of the C. E. division, visited Lake Lanier at Tryon, N. C., on Monday and made a careful inspection of the dam which impounded the waters of that lake until one of the abutments washed out, releasing the water.

The Clemson engineers looked carefully over the site of the ruined abutment so as to avoid carefully the faults in construction which caused its failure. The dam is of the arch type, with all stresses transmitted to the abutment, which was founded on weak rock. This decomposed rock gave way and so did the abutment.

After viewing the dam, the Clemson visitors drove around the shore of the lake basin. The party also inspected the highway bridge under construction at Chick Springs, between Greenville and Spartanburg.

Those making the trip from Clemson were Prof. H. E. Glenn, Mr. Blanford, fellow in civil engineering, and the eight seniors, C. M. Carr, L. S. Bouknight, W. W. Bryan, J. B. Caughman, E. T. McGee, J. B. McKerley, B. M. Smith, and J. E. Walker. A fair sponsor joined the party at Spartanburg, adding much to the pleasure of the trip.

## CLEMSON SENDS MEN TO VOLUNTEER MEET

The Student Volunteers of South Carolina held a very pleasant as well as profitable conference last Friday, Saturday and Sunday at Clinton. There were approximately 150 delegates present from the different colleges of South Carolina. Of these, Clemson had the highest delegation.

Many inspirational messages were delivered by strong christian leaders of this and other countries. Dr. Wilder of New York was the leading speaker on the program.

## CLEMSON GRADUATE TO LECTURE SOON

**Robert Jenkins, '15, Will  
Speak and Show Picture  
on "Oxygen".**

Mr. Robert Jenkins, a graduate of the class of 1915, will give a free illustrated lecture in the college chapel on March 11 in connection with the motion picture "Oxygen" which was secured from the Bureau of Mines by Dr. Pollard.

This industrial picture was made at the plant of The Air Reduction Sales Co., in Richmond, Va., the firm with whom Mr. Jenkins is connected. This picture should prove to be instructive and entertaining to all students of Clemson as it will give a comprehensive view of the importance of oxygen.

Dr. Pollard has made arrangements to have several industrial pic-

### Men Making "E" on More Than Half of Subjects Commended

At the end of the first semester it was found that there were quite a number of students who made creditable records. When a student makes a good class record the folks at home should have their attention called to this fact because they, of course, have no way to determine just how an individual report compares with the others in the class. Special letters of commendation were mailed out with quite a number of reports. Copies of these letters were also sent to the students in barracks.

Each year it has also been customary to select from the best records approximately ten students in each class who stood highest in their scholastic work. On the following list each student made a grade of "E" on at least fifty percent of all the subjects on his schedule during the past semester. This list deserves special attention.

#### Senior Class

Ergle, D. R.  
Green, G. H.  
Kizer, H. F.  
McAlister, L. C.  
McKerley, J. B.  
Maner, J. K.  
Shands, W. A.  
Sherman, F.  
Smyth, J. A.  
Trimmier, L. G.

#### Junior Class

Avent, J. K.  
Baker, J. H.  
Gillespie, S. L.  
Hendrix, T. J.  
Maxwell, W. C.  
Ross, D. H.  
Whilden, C. N.  
Youngblood, J. E.

#### Sophomore Class

Barron, W. H.  
Britt, C. E.  
Hanner, T. G.  
Hughston, T. L.  
Jones, M. A.  
Levin, J. D.  
Marvin, H. W.  
Smith, T. W.  
Wylie, A. P.

#### Freshman Class

Barton, C. R.  
Calhoun, R. G.  
Callahan, J. F.

Leverett, P. B.  
Motes, J. H.  
Poe, H. D.  
Ray, C. E.  
Sander, L. F.  
Shands, H. L.  
Tiencken, W. P.

Pi, carried out to 707 decimal places, is part of the mural decorations put up last fall on the third floor of the Mechanical Arts building at the University of Nebraska. In 1873 William Shanks carried the computations of Pi out to 707 places and then stopped, for no reason at all, it seems, except that he had established a record. Such accuracy is of no theoretical or practical value, however. If only thirty places are used the circumference of the whole visible universe could be calculated so finely that the error would be imperceptible with the most powerful microscope.

tures shown here this spring, one of them being on "Dynamite" which is released by the Dupont people.

## EDITORIAL

### ENGINEERS AND SAINT PATRICK'S DAY

Saint Patrick, the jolly patron of Ireland, is also the patron saint of engineers, and the engineering profession, including students at many engineering colleges, celebrates his birthday with much glee.

It seems to us that some celebration of Saint Patrick's Day by engineering students at Clemson might add to the already high esprit de corps of that body of cadets. Of course the celebration need not be nearly so elaborate as that described below, but the following article tells of the way the University of Alabama student engineers celebrate the day. The article is from THE CRIMSON-WHITE:

March 17th will be a big day for local engineers again this year, according to plans now being prepared by certain persons high up in engineering circles. It will be remembered that on that day last spring the hard-working engineers laid aside their sliderules and T-squares for a brief twenty-four hours and gave themselves a holiday on a large scale. The occasion is St. Patrick's Day, celebrated by engineers the world over as the day consecrated to their patron saint; and an unthinking engineer it is who goes without his shamrock on March seventeenth.

Just why St. Patrick, already overburdened with his duties as patron saint of Ireland, should have still more work heaped upon him in the keeping up with the many members of the engineering profession, is a point which has become a trifle involved in time. It is said, however, that he won for himself both these titles in his famous feat of freeing the Emerald Isle from snakes. This involved building ships for the transportation from Africa of the monkeys, bricks, or whatever it was that he used for the extermination of the snakes; and being the first builder of ships on a large scale, with the possible exception of Noah, he has been called the first engineer and the father of the profession.

Plans for this year are as yet tentative, but a brief outline of what happened last year may be in a measure indicative of the future. St. Pat started things off by arriving in a cloud of dust and being welcomed by suitable committees. He selected a queen from the crowd of co-eds anxiously eyeing him, and she very graciously chose the rest of them as her maids. Comer Hall was keeping open house all morning, and throngs of people invaded the various laboratories, even including that holy of holies, the Physics Lab. After leading one of these tours of inspection, St. Patrick instituted a search for the Blarney Stone, which was finally located under a foot of fresh dirt nearby. He allowed his queen to kiss a clean spot on the stone, and then set about his further business of leading the parade. This was the feature of the daylight part of the program. All the departments of the engineering school were represented, as were all engineering organizations and many Auscaloosa industries and establishments. A banquet was given engineers and their fair damsels that evening at Terrace Garden, followed by a dance, which capped off the day's festivities.

Whether or not this year's program will be modeled after last year's, all our engineering students may be assured of a full day. More definite plans will be announced later.

Anderson College,  
Anderson, S. C.  
February 21, 1925.

Mr. F. B. Leitzsey,  
Joke Editor of "The Tiger",  
Clemson College, S. C.

Dear Sir:

As we have been publishing the following advertisement in the various college papers, we thought that possibly you would be so kind as to publish it in "The Tiger". We are four rats of the fairer sex, young, pretty, and lovable. But it seems that the fates are against us, for we have not yet met our "Prince Charming." Please send us the names of your most popular "Shieks" and "Teahounds."

Thanking you in advance for your kind services, we remain,  
Yours to be loved,

Lonesome Ones.

Klemson Kollege,  
February 23, 1926.

Lonesome Ones,  
Anderson College,  
Anderson, S. C.

Dear Ladies:

As I have nothing to do and plenty of time to do it in, I'll answer your advertisement for a "prince charming". It grieves me greatly to know that you are so lonesome, in fact, I've wept tears for hours. May your hearts soon rejoice and may you meet your mate in the near future.

We have several "shieks" in our school that you should meet. These "love doctors" take their patients from the fairer sex. Mr. "Brunt" Calhoun, a dashing young junior, is our best bet, while Mr. Charlie Garrison is another "heart smasher". We have many more but I'm scared to publish their names as they are bigger and stronger than I. My assistant joke editor, "Jake" Cromer, isn't so bad when it comes to being a regular "beau brummel".

We want you to meet our Lt. Colonel, one "Pistol Pete". He is a "king" among the "queens".

Hoping you will soon be loved (as we know you already are) we remain,

Yours till Niagara Falls,  
F. B. L.

### COLUMBIAN STAGES PROGRAM

The Columbian Literary Society held its first regular meeting of the second semester on last Monday evening. The faithful few of the society were delighted to see quite a number of familiar faces back in their places. Although there are still a few vacant seats, it is hoped that by next meeting enough interest will have been aroused among the members to fill every place.

The program was short, but full of pep while it lasted. As the men on the program performed their respective duties, one could easily see that not a little time had been spent in

preparation.

Messrs. Cooper and Aull, all but surpassed "D. W." as both fluently quoted Edgar Guest. As humorist, Bearden would be a good Physics Prof. Here is a problem that he gave the "newboys" of the society to decipher: If a sophomore weighing one hundred and eighty pounds wields a stick weighing eight pounds with a force of one hundred pounds; will a Freshman who weighs only ninety pounds obey instructions? Why?

Then came the debate, in which the affirmative side won a moral victory. It so happened that due to a misunderstanding, both Thompson and Blakeney expounded on the negative side of the question, leaving no one to uphold the affirmative.

The Columbian extends a cordial invitation to everyone who is interested in hearing a good program carried out.

Shakespeare once said that all the world's stage and we're the players on it. He reckoned without college men, according to the opinions of Mr. Leon Errol, noted American comedian. Errol states that he has noticed few college men do anything sensational in dramatics, and that schools of dramatic art at universities are fine for students' amusement, but they do not manufacture actors. He adds, "College men as actors, are, as a rule, remarkably successful at football."

## Master of Icebergs

—a new kind of college degree

**M**ASTER all the intellectual icebergs you sight at college, and your degree will mean something.

The cold facts you learn, like  $a^2 = b^2 + c^2$ , are but the visible tops of these icebergs. Underneath, as with floating ice, lie the other eight-ninths.

Facts are of little importance till you see them in relation to their great underlying principles. The facts of mathematics strike deep into the other sciences. The facts of history strike deep into sociology, ethnology, geography.

That is why an engineer who learned Ohm's Law can develop a great telephone exchange and control its fascinating forces.

Viewed thus, the endless array of dry facts and dull figures that seem to crowd the years brighten and beckon with a challenge—to look deeper, ever deeper.

#### D. & W. M. I. Lose First Track Meet of Season

The Douglas & Westbury Military Institute track team went down in defeat Sunday for the first time this season losing to the long distance team from Clemson. The Clemson team had only three men in the meet. It is needless to say that these three men took back three first place medals to hang in the hall of fame at Clemson.

The outstanding star for the D. & W. M. was Pistol Peter who would probably have run a better race had it not been for the added weight of a pair of field glasses which he carried. This lad was closely followed by the fiery-headed Red Mitchell, who bids fair to be a worthy successor to his running mate next season. Joe Fishburne also ran a good race for the Institute, but was outclassed by his cohorts.

—J. A. M.

#### Corps of Cadets Undergo a Sunday Afternoon Inspection

The object of the inspection Sunday afternoon was for shoes; not tan shoes, not black shoes, not high shoes, not low shoes, not big, nor little shoes, but MUDDY SHOES.

Any cadet on whose shoes appeared mud, was closely questioned as to his whereabouts Sunday morning. The cadets made a very creditable showing as all mud had been removed before the inspection.

She tripped full lightly across the street.

A flame with joy and laffer;  
She tripped upon the policeman's feet  
And fell upon her after.

Coed—Don't you dare kiss me again.

Ed—All right, I'll stop.  
Coed—Don't you dare! Kiss me again.—Exchange.

"I'm always springing something", said the mouse as he waled into the trap.

Girls look short in knickers, but men look longer.

"Your girl may be de vine, but mine's de berries."

#### A Test Case

"What is it?" asked the doctor who had been hurriedly summoned at midnight.

"Nothing this time, doc," answered Newlywed, looking at his watch. "My wife just wanted to find out how soon you could get here in case the baby was suddenly taken ill."

"How stunning!" remarked the cave woman, as her boy friend wooed her with a club.

#### Please Be Seated

"Gosh, I'm embarrassed. I gotto patch in the seat of my pants."

"Don't let that bother you. Think how you would feel if the patch wasn't there."

"Swing low sweet chariot," cried the darky in the back seat as the car rounded the curve at sixty miles an hour.—Exchange.

Preacher—My duty is to save young girls.  
Student—Save me one.

"The boy has good stuff in him."  
"Yes; he's been drinking some of my \$20 Scotch."—Blue and White.

"Ikey, what's that noise I hear up-stairs?"

"Dat's just fadder dragging his heavy underwear."

"Paw."

"Yes, little one."

"Why does a piston ring?"

"Miss, could you tell me the name of the song the orchestra is playing?"

"Go Feather Your Nest."

"Well, go jump in the lake. I asked you a civil question."

—The Technique.

A woman's mind is as uncertain as a grapefruit's squirt.

"I saw four of your fraternity brothers at the dance last night."

"But I didn't know that you knew any of them."

"I don't, but I recognized the ties you have been wearing."

Prof: "Do you change your environment very often?"

Fred: "I shore do. I change every Saturday night."

Stude—Jimmy Dugan was caught on his yacht in the bay with a cask of liquor, and his defense was that he had three girls with him.

Prunes—How is that a defense?

Stude—Well, isn't a miss as good as a mile?

"Guess my girl in colleg has changed her mind about basketball. She is evidently going in for something more useful."

"How so?"

"Now she writes she has made the scrub team."

Teacher—What student was so rude as to laugh out loud?

Student—I laughed up my sleeve but there's a hole in the elbow.

"What's all that noise down the street?"

"Somebody turned a corner."

"Well?"

"There wasn't any corner."

"Why does a college man have so little tire trouble?"

"Because he makes his flat tires walk home."

He—Why did you close your eyes when I kissed you?

She—Because I thought I was in Heaven—and who ever heard of a red-headed angel?

The supercilious young man was being shown to his room in a small seaside hotel.

"This will do," he said patronizingly. "And I suppose everyone here dresses for dinner."

"Oh, yes, sir," replied the very young chambermaid, "meals in bed are charged extra."

"Was your new car built to make the hills in high?"

"No, it was built to make the girls take notice."

#### Cutting Down Overhead

Fresh (to chef)—Here's a fly in your raisen bread.

Chef—Bring it to the kitchen and I will give you a raisen for it.

#### Logic

He drew her to him. She objected.

"See here," he said, "isn't this the drawing room?"

Objection withdrawn.

Irate Mother at dinner—Johnny, I wish you'd stop reaching for things. Haven't you a tongue?"

Johnny: "Yes, Mother, but my arm's longer."

Nurse—Yes, Willie, your mother has triplets, the doctor brought them.

Willie—Aw, gee, why did we get a specialist?

## FLUNKED COURSES CAUSE EXODUS OF LARGE NUMBERS

### Followers of "Bull Engineering" Forced to Accept Invitations Home

As an aftermath of the horrible nightmare, suffered by the corps of cadets some three weeks ago, and in keeping with the general spirit of examination time, more than half hundred cadets have been extended invitations to go home; a token signifying the esteem in which they are held by the faculty.

Some, like Grant around Richmond, have managed to hang on, somewhat mystifying the corps as a whole as to the methods used. Nevertheless, those who have suffered such a harrassing experience declare that they will never again permit themselves to undergo the agonies of such a trying ordeal.

Many, who departed so uncerimoniously with the beginning of the new semester, were born "dumb-bells" and were incapable of learning. The majority, however, were simply suffering from over-training in a self-coached course in "bull engineering." This bears out the assertion that students should not accept college as a country club; at least, not in the strict sense of the word.

Of course, there is a silver lining. Many who feared the worst emerged dented and battered, but unshaken in their immediate relation to the college. They too, religiously swear sometimes profanely, that they will hari kari if they ever again permit themselves to drift aimlessly on the rocks—but most of them will—wait 'till next May!

## U. D. C. HEAD GIVES MEDAL FOR ESSAY

### Juniors at Clemson, Citadel, and Carolina Compete for Award

Mrs. St. John A. Lawton, President-General of the United Daughters of The Confederacy, offers a medal to members of the Junior classes of Clemson, The Citadel, and the University of South Carolina, for the best paper on the subject, "John C. Calhoun, South Carolina Exponent of States' Rights."

The essays must contain not more than 2000 words. The number of words must be stated in the top left hand corner of the first page. The essays must be typewritten and signed with fictitious names. The real name, the college and the address of the writer must be in a sealed envelope, on the outside of which is the fictitious name, only.

The essays must be filed with Miss Marion Salley, Historian South Carolina Division U. D. C., Orangeburg, S. C., by May 15, 1926. The papers will be judged on their historic and literary merit.

The medal will be presented to the winner during commencement exercises.

For further information see Prof. A. G. Holmes.

## CONCERT ORCHESTRA GAINS PROMINENCE

### Musicians Plan Tour of South Carolina During Spring Months

There has recently come into prominence at Clemson a student organization which is certain to make its impress upon the state. This group, The Clemson Concert orchestra, is composed of twenty-five of Clemson's most enthusiastic musicians.

The orchestra had its beginning two years ago when eleven students, who had been playing together, organized the orchestra and drew up the constitution by which it is now governed. Their purpose, as stated at that time, was the promotion of

the best type of music at Clemson and the attempt to popularize this type of music on the campus.

For two years the orchestra experienced many difficulties, but now its aims are being realized. Beginning with a few violins and a student director, the orchestra now includes in its ensemble the flute, bassoon, oboe, clarinet, cello, viola, violin, string bass, tympani, bells, trumpet, trombone, and French horn. Prof. E. J. Freeman is directing the orchestra and his marked ability, together with a wide knowledge of music, makes him eminently qualified for this position.

The orchestra now plays numbers which would tax the ability of any

orchestra in the South. They now play the compositions of Nevin, Weber, Gounod, Delibes, Beethoven, Haydn, and Mozart, with comparative ease.

Heretofore the activities of the orchestra have been restricted to the immediate vicinity of the college, but this year plans are being arranged for a tour of the state. This tour will probably be made during the last of March and the first of April. Thus the Clemson musicians hope to show the people of the state that Clemson produces other things than capable engineers and farmers.

Some  
Very  
Good  
Reasons  
Why

Should  
Be  
in  
Every  
Ration

This famous protein product of corn is composed wholly of the gluten and bran of sound, whole corn. There is less than 8 pounds of bran in each 100 pounds. The Mass. Experiment Station says corn bran is equal to wheat bran.

Corn Gluten Feed is safe in any quantity. Many feeders have fed it straight as a substitute for corn. One ton contains the protein, vitamins and mineral salts of nearly four tons of whole corn.

Feed Corn Gluten Feed with your corn, oats and barley. Your leguminous roughages will supply all the protein "variety" the animal wants or needs. This has been fully demonstrated by practical feed lot experience.

### Our \$15,000.00 Prize Contest

On April 1 our Prize Contest will start and the following prizes will be awarded and paid to good feeders:

14 Prizes for Cow Testing Associations	\$ 3,000.00
14 Prizes for Individual Dairy Herds	2,100.00
7 Prizes for Championship Cows	1,000.00
14 Prizes for Beef Cattle Feeders	2,500.00
12 Prizes for supervisors or verifiers	2,650.00
24 Prizes for herd managers	1,250.00
37 Prizes for co-operating feed dealers	2,500.00

122 Prizes, totaling \$15,000.00

Every feeder of six or more dairy cows, or forty or more beef cattle is invited to enter this contest. The rules are few and simple and no entry fee is charged. The contest will end September 30, 1926.

This is a big educational program of a great basic industry. It will be conducted on the highest possible plane and is entitled to the same support given to state fairs and livestock shows.

The rules and conditions are fully given in our Bulletin No. 4. Write for it today.

## "A" COMPANY DINES IN SUMPTUOUS STYLE

Staff and Drum-Bugle Corps  
Also Eat; "Spec" Farrar  
Toastmaster

The "fresh" of "A" Company, assisted by food from Capt. Harcombe, entertained most delightfully last Tuesday night in honor of their "old boys". This banquet had been looked forward to with much anticipation, ever since Christmas, for the "rats" had decided in favor of giving the upper-classmen a Christmas present instead of complying to the ancient custom of the upper-classmen giving to the "rats". The regimental staff and the "Drum and Nuisance Corps" were also invited to attend.

The walls of the long "dining hall" were very elaborately and artistically decorated with a smooth mass of white paint and a complicated entanglement of black steam pipes, running the whole length of the hall, and here and there, assisted by an assortment of various kinds of joints and connections, jutting in and out of the wall. The floor plan decorations were of the military type, consisting of three battalions of empty tables assembled in columns of squads and covered with imported homespun linens, made by the "lint-heads" of Clemson. The loud clanging of the crockery by the chocolate colored "zip-slingers" as they ran in and out among the tables in their haste to equip them with all the necessary implements of table warfare added much to the spirit of the banquet.

As soon as our cute little Lt. Colonel "Double Diamond" Douglass could interpret the signal from Toastmaster "Spec" Farrar to ask grace, he replied with "shoot the bull". And the guns were fired!

The position of "Spec" Farrar as toastmaster might be explained. The freshmen preferred to choose one of their class to officiate at the meeting, but as "Spec" acts and resembles a freshman, and as he is the biggest "fool" in the company, he was intrusted with the unlimited authority of toastmaster. To enliven things a bit the master called on little "Wee Wee" Batson, recently elected by a ballot of the whole school as the boy most in love, to relate some of his wide experiences in this line. He said "Never fall in love. But if you do, dive in head foremost, and boys, it is certainly fine!" "Bald-head" Bryan quickly verified the latter part of Mr. Batson's statement. Rat Quincy Moorer then put Captain Jake Wray "in the hole" by describing the method which Jake uses in keeping his cheeks so rosy. After talks had been made by Captain Wray, Captain Bryan, Colonel Finklea, and Lt. Colonel Douglass, the banquet was blown to pieces with "fifteen rahs" for Harcombe.

Two freshmen who came to the University of Wisconsin from Norway last September won 13 of 18 points for their team in an inter-collegiate ski and skating tourney at Lake Placid, N. Y.

The University of Nebraska held its first ice carnival a few days ago. There was skating, skiing, toboggan sliding and a beautiful ice float parade. One of the features was a "Charleston on the Ice" contest.

## CLUBS AND SOCIETIES

### DAIRY CLUB MEETS

The Dairy Club held a call meeting on Tuesday evening for the purpose of deciding the time for regular meetings. The activities of this club were revived after their long period of dormancy.

The time which was decided upon as best suited to all of the members is after "long roll" on the second Tuesday and the fourth Thursday evenings of each month. Col. O. R. Cole has granted permission to hold the two meetings at their respective times. These plans will not cause many conflicts, and should make possible the presence of a large attendance at each meeting.

Arrangements have been made to have several god speakers present at early meetings. Refreshments will be served at various times. No member can well afford to miss either of these privileges.

### TEXTILES HEAR BLAIR

The regular meeting of the Textile Society was held on last Wednesday evening. The members enjoyed an interesting talk by a former textile professor, Mr. W. G. Blair.

The president, W. R. Elliott, introduced Mr. Blair, now of the Armstrong Cork and Insulation Company. Mr. Blair is the southern representative of this company, and the society feels honored that he paid the visit. The seniors were especially anxious to hear Mr. Blair speak because of the fact that he taught them "Designing" for a short time during their Sophomore year. All of the government men in the testing division here attended the meeting. Mr. Blair was once in charge of this work here.

The lecture was entirely on "Cork". Cork was traced and explained from the planting of the tree to the finished products. Mr. Blair stressed the use of cork rolls in the mills. He is introducing their use in the South, and at present has several of the leading mills of this section using cork rolls.

The meeting was enjoyed very much by the ones present, and also proved to be of great benefit.

Mr. Blair was the guest of Prof. R. K. Eaton while at Clemson.

—C. P. W.

### COLUMBIA ELECTS OFFICERS

The Columbia Literary Society held an informal meeting on Tuesday evening, February 16, for the purpose of electing officers for the third quarter of the scholastic year. Mr. H. A. Brown, who was elected at the beginning of the year as third quarter president, presided over the meeting.

The following officers were elected: H. C. Coleman, vice-president; S. E. Liles, recording secretary; H. S. Gault, corresponding secretary; C. B. Day, senior-critic; J. L. Aull, junior-critic; H. L. Baldwin, chaplain; and H. D. Poe, sergeant-at-arms.

We note from The Daily Californian that a college romance was recently brought to a close when one of their negro janitors, aged 70, eloped with a cook at the university.

The meeting being very informal, several topics pertaining to the upbuilding of the society were discussed. Among these was discussed the matter of cutting down the entrance fee for the remainder of the year.

Having launched herself successfully on another semester, the Columbian looks forward to a bright and prosperous future.

### CALHOUN MEETS

On last Tuesday evening the Calhoun Literary Society held its regular meeting. There was some increase in the number present, but the attendance is not what it should be. Every member of the society should feel it his personal duty to be present at all meetings. A large attendance not only helps the record and morale of the society, but also helps the individuals who go to make up this large attendance.

A declamation was delivered by L. A. Seaborn, which was followed by the debate. The two members of the negative side being absent, J. A. Milling and J. Reaves volunteered to fill the vacancies. The affirmative side was upheld by B. V. Cornwall and T. W. Smith.

The debate resulted in one of the best that has been heard on the Calhoun platform this season. Much credit is due the members of both sides, but unusual praise should be given Mr. Milling and Mr. Reaves. With no preparation they put up an

argument which will be long remembered, and finally won the decision of the judges. The query was: Resolved, That the Literary Standards at Clemson Should Be Raised.

—L. A. S.

### ARCHITECTS MEET

The Architectural Society held its first meeting of the present year on Tuesday evening. The attendance was very good, and a well prepared program was enjoyed by all who were present.

This meeting was conducted by the Freshmen taking the Architectural course. J. C. Galloway, acting as president, served in this capacity in a worthy manner.

The society was very fortunate in securing Prof. M. E. Bradley for the speaker. His lecture on "Modeling in Architecture" showed what could be done in this art. The lecture was instructive as well as interesting, and should appeal to all architects. It is hoped that Prof. Bradley can speak at future meetings.

H. Adams gave a fine selection of jokes which was enjoyed by everyone.

The last part of the program was the serving of the refreshments. Much interest and time were taken up at this, but the enjoyment overbalanced the trouble.

The Freshmen are to be complimented on the way they handled the meeting. It is hoped that all Freshmen taking Architecture will attend

the meetings and feel that they are members. The society urges all members to attend every meeting and make each one a success.

—C. R. D.

### PALMETTO ELECTS

The Palmetto Literary Society held its first regular meeting of the present term last Thursday evening. The regular program was postponed on account of the fact that officers were to be elected.

The men who were selected to guide the affairs of the society were as follows: J. B. Hester, vice-president; H. S. Hinson, literary critic; W. L. Baker, recording secretary; and F. J. Fishburne, corresponding secretary. R. H. Cain had previously been elected to the presidency. Under the able leadership of these officers the work of the society is sure to show marked advancement.

All indications point to a successful term. However, greater interest must be displayed in the affairs of the society work if the members hope to attain the highest possible degree of the training which is so badly needed by all. The attendance must not be neglected. Let everyone put some "pep" into it and make this a successful term.

—F. J. F.

The lowest man I ever knew, borrowed my false teeth, then asked for a chew.

**When silvery  
moonlight falls on town and  
field—and the long, joyous  
tour home is ready to begin  
—have a Camel!**

WHEN moonlight washes woodland and hills with platinum light. And the tour home is ready to begin—have a Camel!

For Camel makes every smooth tour smoother, adds of its own contentment to every delightful journey. Camels never tire your taste or leave a cigaretty after-taste. Pay what you will, you'll never get choicer tobaccos than those in Camels.

So this night as the forest-topped hills race by in moonlit procession. As the magic road curves through the colonnade of birches—have then the finest made, regardless of price.

Have a Camel!

Our highest wish, if you do not yet know Camel quality, is that you try them. We invite you to compare Camels with any cigarette made at any price.

R. J. Reynolds Tobacco Company

Camels contain the very choicest tobaccos grown in all the world. Camels are blended by the world's most expert blenders. Nothing is too good for Camels. In the making of this one brand we concentrate the tobacco knowledge and skill of the largest organization of tobacco experts in the world. No other cigarette made is like Camels. They are the overwhelming choice of experienced smokers.

## CLEMSON RIFLE TEAM PARTICIPATING IN MATCH WITH ALL FOURTH CORPS AREA

### Two More Stages to Be Fired in Collegiate Com- petition

With one-half of the Fourth Corps Area Collegiate match completed, stock of the Clemson rifle team is picking up.

Standing of the team for the first and second stages, two scores prone, one kneeling, one standing, are:

Haskell, A. C. ....	371
Clyburn, T. M. ....	371
Cox, S. M. ....	370
Marshall, R. M. ....	364
Jones, M. A. ....	365
Miller, L. R. ....	361
Caughman, J. M. ....	359
Douglass, W. J. ....	358
Padgett, L. C. ....	357
Gillespie, D. D. ....	353
Hester, J. B. ....	352
Seaborn, L. A. ....	340
Ray, C. E. ....	340
Gillespie, S. L. ....	322

The possible score for the four targets is four hundred.

Two stages remain to be fired, the third, with one score prone and one standing, to be completed this week and the fourth, two scores prone, the first week in March.

There are seven other possible contenders for places on the team, which may be changed each stage, and until Saturday no one member is sure of his place.

The schedule committee and the spring weather have made it necessary to call off some ten scheduled matches with other colleges, hurting Clemson's riflemen some, but they are optimistic over the prospects of the Corps Area match, the winners of which will shoot in the National Collegiate matches for the champion rifle club cup.

## CAMPUS NOTES

Mr. and Mrs. S. M. Martin entertained at a lovely progressive dinner Monday evening in compliment to Dr. and Mrs. E. W. Sikes.

The Winthrop Daughters met Monday afternoon with Mrs. J. D. Holler. Officers for the ensuing year were elected as follows: Miss Margaret Sadler, president; Mrs. M. E. Campbell, Vice-President; Miss Virginia Shanklin, secretary and treasurer; Mrs. T. S. Bruce, gleaner.

The Choral club met Tuesday evening, when it was declared the best practice yet held and was largely attended. A public entertainment will be given some time in the spring.

Mrs. W. W. Long entertained the Andrew Pickens chapter, D. A. R., Monday afternoon at a Washington birthday party.

Mr. and Mrs. J. D. Harcombe were at home to a number of their friends Monday evening in honor of Dr. and Mrs. Stover of New York.

The Business Woman's circle met Tuesday evening with Mrs. S. R. Rhodes. The meeting was attended by nearly all of the members.

Mrs. O. R. Cole was hostess to the bridge club at its regular meeting Wednesday morning. A delightful lunch was served at noon.

Mrs. E. W. Sikes entertained the members of the Book club Wednesday afternoon. During the social hour a chicken salad course with coffee was enjoyed.

Mrs. A. Musser was hostess to the members of the Tuesday, Morning Bridge club this week.

A most enjoyable bridge party was given by Mr. and Mrs. R. K. Eaton Thursday evening. At the close of a delightful evening, the hostess served tempting refreshments.

Prof. and Mrs. H. W. Barre entertained at a lovely anniversary dinner Tuesday evening at Starr.

This is a contribution of a certain textile student about one of his Profs.

### Not a Cross Word (Quoted)

I don't know so much about this course, But you can get as much here as any source.

The "Textile World" tells us what to do.

I'll read very briefly these things so true.

These are the problems that will confront you.

Fr instance, this is what "cotton" states to do.

If the ground goes up and the whip comes down,

This is the way the yoke is turning 'round.

Now Mr. "Dobby", don't you see Now fr instance, how twould be, If we could take this thing from here And quickly put it over there?

Mr. Smiff-wh-sir, please tell me In "other" words don't you see, You see how to—is this thing just right?

How would you go about it just from sight?

I know you've seen it working on the loom.

It's on that dobbie in the weaving room.

In "ower" words, don't you see, This is a puzzle—One, two, three.

Roller skating is the order of the day for the co-eds of the University of Texas during the week preceding exams, according to Miss Anna Hiss of the physical activities department. "We are trying to encourage the girls to engage in some form of recreation which will get them in better condition for the examination week." We wonder if that's the only reason? Those auto parties out west \* \* \*

## Tie a tin to trouble

A TIDY red tin of Prince Albert, to be exact. There's the greatest little trouble-chaser in the known world. Smoke P. A. and pipe-grouches choose the nearest exit.

Yes, Sir, P. A. is right there with the Pollyanna stuff. Sunshine, gladness, the light heart, the bright smile. Because Prince Albert is the cheeriest, chummiest tobacco that ever tumbled into a briar or corncob.

Smoke P. A.—and smile. Cool, comfortable P. A. Fragrant, friendly P. A. Not a tongue-bite or throat-parch in a ton of it. The Prince Albert process hung the "No Admittance" sign on Bite and Parch the day the factory opened.

Get a tidy red tin of P. A. today and give pipe-worries the gate.

## PRINCE ALBERT

—no other tobacco is like it!

P. A. is sold everywhere in tidy red tins, pound and half-pound tin humidors, and pound crystal-glass humidors with sponge-moistener top. And always with every bit of bite and parch removed by the Prince Albert process.

## SPORTS

## TIGERS TO PLAY NORTH CAROLINA

## SPORTS

The Tiger basketball team is off to the S. I. C. tournament in Atlanta on Friday and Saturday of this week. This tournament is meant to be the final settling up of all this squabble over the conference championship, and the Tigers are going down there to help settle the argument.

For the past year the University of North Carolina has flaunted the pennant, and they are expressing their intentions of keeping it for another year. As the situation now stands, the North Carolinians and the Clemson Tigers meet in the preliminary scrap. This is not the first meeting of these two teams this season, and the Tigers are welcoming the chance to encounter their old foe again. They have an old score to settle with the N. C. U. lads, and they are going out to do it in proper style. The Tiger lads are determined to give the Tar Heels a merry race if they expect to cop the title again.

It was as if a thunderbolt from a clear sky had struck Clemson when it was announced that the University of Havana had asked to schedule three games with the Purple and Gold baseball team to be played in Havana this spring, and two to be played here. The effect on the student body was galvanic. Immediately the interest in that great American sport, which was already growing rapidly, took a more sudden surge as the number of candidates for the team doubled almost overnight.

The corps is now waiting in anxiety and dread lest this trip should not be scheduled. The prospective members of the team are filled with enthusiasm over the proposed trip, and it has become their ambition and their hope that such a wonderful offer will not be turned down.

With eight letter men back and an equal number of stars from last year's Rat team back this spring, the prospects for a fast and notorious ball club at Clemson are very good indeed. And these are not all the good material that Coach Cul Richards has to select his team from. From the looks of the bunch of aspirants out for practice every afternoon there must be fifty men trying out for the various positions.

Batting practice was begun last week, and also work done in getting the diamond in condition for infield practice which is to begin soon. Captain McGill is pleased with the spirit and the showing so far and is very enthusiastic over such promising prospects.

An undergraduate of Ohio State University is now studying at a university in Germany. He says that there is a decided contrast to the American system. Quizzing and threats of expulsion are beyond the pale of consideration. Their principle is that one comes to school for one subject only, and the different groups are thus segregated. Text books are not used and one chooses his professors with the utmost care. Degrees are given for knowledge rather than credit hours. Gambling flourishes and dueling is a favorite sport.

Professor Ira B. Cross of the University of California may be long remembered as a champion of the rights of men. Annoyed at the feminine students who powdered their noses in class, he invited the men of the class to do likewise. Consequently two men appeared in class armed with Gillettes, lather and brushes. After class had opened they lathered and shaved. After the applause Professor Cross declared that the shavers would be awarded A's for the term in recognition of their services in behalf of the manhood of America.

## GAMECOCKS AVENGE FIRST CLEMSON WIN

Carolina Quintet Wins in Last Game at Clemson This Season

The Clemson Tigers were defeated here last Saturday night by the Carolina Gamecocks, by a score of 36 to 20, in a game that was marred by many fouls. The Tigers struggled manfully, but in vain, and when the final count was taken, the University team held a vantage of sixteen points.

Although the Birds guarded closely, they were unable to keep the Clemson forwards from scoring. Brock registered a total of ten points and Newman four, which accounted for the majority of the Tigers' share. Fair and Holcomb were the stars for the Gamecocks, each engineering some beautiful passes, and scoring ten points each. The redoubtable Bill Rogers showed wonderful form and ever threatened to break through the Tiger defense and annex many points, but so effectively did McGlone do his work that the flashing Bird was thwarted at every turn.

The Gamecocks led 16 to 9 at the half, and held a proportional lead until the end of the game.

Clemson (20)	Carolina (36)
Newman (4)	Rogers (7)
	F.
Brock (10)	Fair (10)
	F.
Roy (1)	Holcomb (10)
	C.
Eskew (3)	Seidman (5)
	G.
McGlone (1)	Russomano (4)
	G.
Clemson substitutions: Hendee (1), Allison, Palmer and Martin.	
Referee, Cocke, (Georgia).	

## OLD KING SWAT REIGNS ON RIGGS FIELD AS TIGERS PREPARE FOR BASEBALL TIME

With the coming of the early spring days the loyal henchmen of Old King Swat got out the royal swat sticks and the horse-hide spheres with which they are wont to disport themselves, and are now bustling with enthusiasm over the coming of the American sport. For over a week Riggs Field has been the scenes of varied activity, and dozens of round white objects may be seen whirling back and forth through the air as they are knocked from place to place over the field. But no one seems to care,—not even the horse-hide pills that are subjected to such rough treatment. There is an air of eager expectancy that dominates the minds of the many candidates, and there is much conjecture, and many dream of a rumored trip into a far country.

When it was announced that the Tiger baseball team would probably get a trip to Cuba this spring to play the University of Havana the effect on the corps was electric, as a result of which the number of candidates for baseball doubled immediately. It is now the chief topic of interest on the campus, and it is the hope and prayer of the cadets that this trip will be taken.

However, baseball practice is going on just the same without a hitch, as the aspirants for the varsity nine are working themselves into shape so as to be ready to play as early as possible. The Tiger schedule opens with two games with Georgia Tech, to be played in Atlanta on the eighteenth and nineteenth of March, probably to be followed by two games with the University of Florida and three with the University of Havana if these last three can be arranged. Should the Havana trip be arranged there will be two return games with that institution to be played either at Clemson or in Anderson on the fifth and sixth of April.

The prospects for a good ball club at Clemson are better this year than they have been for several years past. There are eight letter men back this year and each of them is determined to make his letter again McGill, captain and catcher; "Lefty" this year. The old letter men are Smith and Martin, pitchers; Herron, infielder; and Jones, Carter, and Felder, outfielders. The new men who come up from last season's Rat team are Dunlap, Hudgens, Walt Martin, Moore, Manning, Harmon, Hane, and Abbott. These are all men who played in most of the Rat games last year and are responsible for the splendid record that that bunch of Cubs made for themselves.

Work was begun on the diamond last week and it is being put into first class shape rapidly. Coach Cul Richards, who is to coach baseball, is making the infield an object of much attention. He soundly believes in a smooth diamond, absolutely free from hollows and gullies, to insure increased speed and sure footwork. Coach Cul is going to nurse his infield like it was a hot-house plant, and he intends to keep it worked over and ironed out after each afternoon's practice.

As yet only batting practice and some work out for the pitchers have been on docket, but infield practice will be begun soon. The probable assignment of positions has not yet been made, but it is expected that several men will be shifted from their old berths of last season to cover a different bag this year. Many probable shifts have been discussed at length but the final arrangement will not be had for some time to come. Captain McGill says, however, that his ambition is to catch nine innings in every game this season.

The "goils" at the University of Ohio are surely a tough bunch. During a recent production of "Amorocco" by Scarlet Mask, their dramatic club, the chorines were impersonated by the boys. Some kind-hearted soul was heard to remark, "It's a shame those nice-looking boys have to associate with such tough-looking girls."

## GEORGIA BULLDOGS WIN OVER CLEMSON

Red and Black Five Gets 44-28 Victory Over Tiger Basketeers

In a game that, with the exception of a few bright spots, was slow and rather one-sided the Tiger basketball team went down 44 to 28 before the steady attack of the Georgia Bulldogs, in Athens last Wednesday night.

The long shots of Captain Richardson of Georgia, and the guarding and shooting of Wallace Roy, Tiger center, made these two lads the stars of the game. The Georgians captured the lead by a foul shot followed closely by a number of field goals. The Bulldogs amassed a total of fourteen points before the Tigers were able to score.

At the half the score stood 19 to 9 for the local team, but in the second period he Tigers staged a rally of which Roy starred by marking up eight points in rapid succession. Richards, of the Bulldogs, earned the plaudits of the stands by his beautiful rainbow shots from near the center of the court. He also succeeded by some spectacular guarding in breaking up Tiger plays, and was leading scorer of the game with eighteen points to his credit.

Georgia (44)	Clemson (28)
Richardson (18)	Brock (10)
	F.
Johnson (2)	Newman (5)
	F.

	C.
Frian 2)	Eskew (1)
	G.
Forbes (1)	Palmer (1)
	G.

## TIGERS DEFEATED BY FURMAN FIVE

Last Pre-Tournament Game For Clemson Lost 37 to 31

The Clemson basketball team received a defeat at the hands of the Furman Hornets Monday night by the score of 37-31. The game was played in Greenville and was cited as being the most exciting game of basketball seen in that city this season.

The Tigers had things entirely their own way during the first half of the game. Newman, together with his cohorts, ran wild, dropping the ball through the basket for a total of 16 points, while the seemingly disorganized Furmanites did well to gather a measly five points.

At the beginning of the second half the tide turned with a rush. The Furman team, led by McGee, started a driving offense which the Tigers seemed unable to stem. This offense continued, being interrupted only by the many fouls which, as a matter of fact, or referee, impeded rather than interrupted it. When the last whistle sounded, Furman had registered a courageous comeback and held the big end of a 37-31 score.

Clemson (31)	Furman (37)
Brock (6)	Smith (5)
	F.
Newman (17)	Dorman (8)
	F.
Roy (1)	Beasley
	C.
Palmer	Byrne (6)
	G.
Eskew (5)	Wilkins (1)
	G.

Substitutions: Clemson, Hendee (1), McGlone, Martin, Midkiff; Furman, McGee (14) Gibson (3), Black, Referee, McLean, (Newberry).

## J. D. BLAIR, '17, NEW MERCER COACH

Mr. J. D. Blair, Clemson, '17, has been named Freshman football coach at Mercer University. Mr. Blair for the past four years has been head coach at Lanier High School at Macon, and secretary of the Macon baseball club of the South Atlantic League.

His record in both these positions is good and shows that he is capable of big things. Mr. Blair will assume his duties at Mercer at the close of the 1926 baseball season.

Clemson wishes him worlds of success, and is certain that Mercer is fortunate in securing J. D. Blair.

There's always someone taking the kick out of life. The authorities at the University of Oklahoma have banished automobiles from the campus. One enterprising student brought an aeroplane to school but this soon fell under the ban also. The Oklahomans now have under discussion the advisability of bringing back an old-time antique phrase may readily be "horse-and-buggy." A definition of this antique phrase may readily be found in any unabridged dictionary by those not well versed in ancient history.
